

**In the Claims**

1. (Currently Amended) A method performed by at least one information handling system associated with a first client, the method comprising:  
receiving an excerpt of information comprising an item of music; and  
in response to a configuration specified by one or more files of the information handling system, performing at least one of the following operations: automatically translating the excerpt from an XML format into a non-XML format, so that the translated excerpt is compatible for operation with the information handling system; and automatically translating the excerpt from the XML format into an alternate XML format, so that the translated excerpt is compatible for operation with the information handling system.
2. (Currently Amended) The method of claim 1, wherein the excerpt ~~is an item of music~~ further comprises a music playlist.
3. (Currently Amended) The method of claim 1, wherein the ~~configuration is specified by one or more files of the information handling system~~ XML format is a generic XML format that is platform independent and not specific to the configuration of the information handling system.
4. (Currently Amended) The method of claim 1, wherein the excerpt has a generic XML format, and wherein automatically translating the excerpt into the alternate XML format comprises:

automatically translating the excerpt from the generic XML format into the alternate XML format.

5. (Currently Amended) A system, comprising:  
at least one information handling system associated with a first client for:  
receiving an excerpt of information comprising an item of music; and  
in response to a configuration specified by one or more files of the information handling system, performing at least one of the following operations: automatically translating the excerpt from an XML format into a non-XML format, so that the translated excerpt is compatible for operation with the information handling system; and automatically translating the excerpt from the XML format into an alternate XML format, so that the translated excerpt is compatible for operation with the information handling system.
6. (Currently Amended) The system of claim 5, wherein the excerpt ~~is an item of music~~ further comprises a music playlist.
7. (Currently Amended) The system of claim 5, wherein the ~~configuration is specified by one or more files of the information handling system~~ XML format is a generic XML format that is platform independent and not specific to the configuration of the information handling system.
8. (Original) The system of claim 5, wherein the excerpt has a generic XML format, and wherein the information handling system is for:

automatically translating the excerpt from the generic XML format into the alternate XML format.

9. (Currently Amended) A computer program product, comprising:  
at least one computer program processable by at least one information handling system associated with a first client for causing the information handling system to:  
~~receiving~~ receive an excerpt of information comprising an item of music; and  
in response to a configuration specified by one or more files of the information handling system, perform at least one of the following operations:  
automatically translate the excerpt from an XML format into a non-XML format, so that the translated excerpt is compatible for operation with the information handling system; and automatically translate the excerpt from the XML format into an alternate XML format, so that the translated excerpt is compatible for operation with the information handling system; and  
apparatus from which the computer program is accessible by the information handling system.
10. (Currently Amended) The computer program product of claim 9, wherein the excerpt is ~~an item of music~~ further comprises a music playlist.
11. (Currently Amended) The computer program of claim 9, wherein the ~~configuration is specified by one or more files of the information handling system~~ XML format is a generic XML format that is platform independent and not specific to the configuration of the information handling system.

12. (Original) The computer program product of claim 9, wherein the excerpt has a generic XML format, and wherein the computer program is processable by the information handling system for causing the information handling system to:  
automatically translate the excerpt from the generic XML format into the alternate XML format.
13. (New) The method of claim 1, wherein the non-XML format is specific to the configuration of the information handling system.
14. (New) The method of claim 1, wherein the alternate XML format is specific to the configuration of the information handling system.
15. (New) The method of claim 1, wherein the excerpt is a music playlist having a generic XML format, further comprising automatically translating from the generic XML format to a Windows Media Player format.
16. (New) The system of claim 5, wherein the non-XML format is specific to the configuration of the information handling system.
17. (New) The system of claim 5, wherein the alternate XML format is specific to the configuration of the information handling system.

18. (New) The system of claim 5, wherein the excerpt is a music playlist having a generic XML format, further comprising automatically translating from the generic XML format to a Windows Media Player format.
19. (New) The computer program product of claim 9, wherein the non-XML format is specific to the configuration of the information handling system.
20. (New) The computer program product of claim 9, wherein the alternate XML format is specific to the configuration of the information handling system.
